## PROJECTS

---

### Booksforme-2019

#### Python

- A book recommendation web application for people who loves reading.
- Created using ML-based collaborative approach to filtering or predicting the users' book preferences.
- 1000+ book dataset ratings used for recommendation based on their past choices and behavior.

### Cryptify-2020

#### MATLAB

- A messaging services web application for secure communication.
- Developed as an encryption-based messaging service that send and receive messages securely.
- Use chaotic neural network (CNN) algorithm for data encryption.

### Travel Nepal-2021

#### Flutter+Dart

- A travel guide mobile application for planning a trip to your favorite destination.
- Provide services like ticket and hotel booking to 1000s of tourists that visit Nepal.

### Haat Bazzar-2022

#### React+Express

- An ecommerce online shopping website with 1000s of products.
- Developed using react and express framework.

## EDUCATION

---

### Kathmandu University, 2018-2022

Bachelors in computer engineering

GPA 3.52
